Course Description and Course Objectives: In this introductory course the general goal is to investigate some fundamental philosophical questions. We will begin with a brief introduction to the nature of language, logic, and conceptual analysis. We will then investigate the following philosophical questions: What and how can I know something? Does God exist? What makes an action morally right or wrong? and What is the nature of human consciousness? You will have the opportunity to develop your own answers, in writing, to these philosophical questions. Some specific objectives that will aid in the attainment of the general goal are:

- to gain an understanding of the variety of answers that have been given to the philosophical questions mentioned above,
- to gain an appreciation of some historical and contemporary philosophical texts,
- to hone one’s skills in identifying and evaluating arguments, and
- to improve one’s ability to both think and write clearly and critically.

Assignments: Reading assignments will be issued during each class meeting. Since this is a philosophy course where reading is essential, students are *strongly* encouraged to do the readings before the lecture on that assignment. This practice will reinforce basic information while providing students the opportunity to formulate pertinent questions about difficult material for the upcoming lecture. If you do not do the readings, this class will be extremely difficult.

Graded assignments will include:

1. At least 10 quizzes; if there are more than 10, then only the best 10 will count towards the student’s final grade,
2. Reading précis. The best 10 will count toward the student’s final grade. Précis must be turned in at the beginning of class and must be a full typed page (at least 250 words).
3. Three essay exams. (You will have to supply 5 blue books before the end of week 2)
4. One 1,200-word paper.
Grading: Since this course satisfies the liberal studies area IV requirement (Gordon Rule), students who fail to write at least 3000 words will receive a grade lower than C-. Assignments will count toward the final grade as follows:

Each exam, the paper, the précis average, and the quiz average will all count as $1/6$th of your final grade. To determine your grade, add all six totals together and divide by six—that will be your course score. Take the course score and find where it falls on the scale below.

Final grades will be assessed on the following scale:

\[
\begin{array}{cccc}
100-93 & A & 86-83 & B & 76-73 & C & 66-63 & D \\
92-90 & A- & 82-80 & B- & 72-70 & C- & 62-60 & D- \\
89-87 & B+ & 79-77 & C+ & 69-67 & D+ & 59-00 & F \\
\end{array}
\]

Attendance: Attendance is not mandatory, and will not be a factor in the determination of final grades. Nevertheless, because of the abstract character of much of the material covered in this course, regular attendance is strongly recommended. Additionally, students should make every effort to be on time to class for late arrivals are disruptive and rude to both the instructor and fellow students. Leaving class early is equally disruptive. So, students that need to leave early should notify the instructor at the beginning of class, and sit where it will minimize disturbance.

Late Policy: All late work must be accompanied by written documentation from a health care provider (or other appropriate source; further legitimate excuses may include religious and university obligations) explaining why the student was unable to complete the assignment on time. When possible, I should be informed before the assigned work is due. When these conditions are satisfied, appropriate accommodations will be made for the student to complete the missed assignment. When these conditions are not satisfied, the following conditions hold:

1. Quizzes cannot be made up.
2. All papers and précis are due at the beginning of class.
   (i) Précis cannot be turned in after the class for which the reading is assigned.
   (ii) 5 points will be deducted from papers [2 from précis] received after the beginning, but before the termination, of the class period in which they are due.
   (iii) For papers received after the end of the class in which they are due, 10 points will be deducted for each 24 hour period following the end of that class. For example, 10 points will be deducted from a paper submitted an hour after the relevant class period, while 20 points will be deducted from a paper submitted 25 hours after the end of the same class. Late penalties will be assessed for the time at which papers are received. “Received” means handed to the instructor, the teaching assistant, or philosophy department staff that signs and writes the time and date on the paper before putting it in a mailbox. It is your responsibility to make sure that papers are turned in on time.
3. Exams cannot be made up.

Honor Code: Students must uphold the Academic Honor Code published in The Florida State University Bulletin and the Student Handbook. Violations of the honor code may result in an ‘F’ for the course or other disciplinary action. On-line at: http://registrar.fsu.edu/bulletin/undergrad

Students with Disabilities: Reasonable accommodations will be made for students with disability. Such students must (1) register with, and provide documentation to, the Student Disability Resource Center (SDRC), and (2) submit a letter from SDRC stating that such academic accommodations are needed. All relevant documentation should be submitted within the first week of classes or as soon as a disability is identified.
