

Information Technology Security Plans

Exercise

1. Take a look at the following information technology security plans or suggestions for creation of such plans.
 - a. University of Utah Information Technology Security Plan <http://www.it.utah.edu/SecurityPlanSep03.pdf>
 - b. State of Iowa Enterprise IT Standards
<http://www.iowa.gov/government/ite/standards/enterpriseit12sec.html>
 - c. Santa Clara County-wide Information Technology Security Program Executive Summary
http://www.iowa.gov/government/ite/standards/enterprise_it/12seciri.html
 - d. NIST Special Publication 800-18 Guide for Developing Security Plans for Information Technology Systems
<http://csrc.nsl.nist.gov/publications/nistpubs/800-18/Planguide.PDF>
2. Identify key theme areas that appear to be needed in such a plan.
3. Obtain a copy of a local agency's information technology security plan.
4. Compare the key theme areas and those of the local agency's information technology security plan. If the local agency does not have a plan, create a mock one for the agency's use.
