

Careers Competency Model

The model is designed to provide guidance to help academic programs identify and prepare individuals for job opportunities in the technology industry to assist various professions, including recreation, park and leisure agencies, and it also provides a model or framework for recreation, park and leisure agencies to recruit, hire and train the best people to work in their departments with the appropriate skill base.

The Information Technology Competency Model is comprised of several layers or *tiers*. For a comprehensive view of the model and its components, please view the *Compendium* for the materials that are located there. You may also view an interactive model at www.careeronestop.com/CompetencyModel. Then select the tab labeled *High Growth Industry Models*. It will redirect you to another page where you will see the pull down menu for *Information Technology*. Figure 14-22a in the text illustrates the various tiers of this model.
