

## **Physics 427 *Advanced Electronics***

### **Lab Safety Rules**

1. Students should preview the lab manual and write down questions before doing the lab.
2. Never short the output of a battery or a power supply.
3. When handling with 120 V AC power line, make sure there are no exposed wires.
4. Report defect or damaged electronic devices to the instructor.
5. Discuss with your partners sufficiently before you test your ideas in the lab.
6. Be quiet when there are other groups working in the lab.
7. Sort the lab after you finish your experiment.
